FORECAST PREPARED BY

Scott J. Carpenter - (307-640-2362)

Highlights

Winter Storm Watch, Sierra, Friday night through Sunday morning, above about 6000 ft

Storm system still on track to bring first significant periods of rain and mountain snow of the season, along with windy conditions and much cooler temperatures for central and northern areas.

Operational Period Forecast (0700 Thursday, November 2nd - 0700 Friday, November 3rd)

NorCal: High temperatures in the mid 50s to 60s. Rain showers move into northern CA Thursday night. Winds 5 to 15 mph, except increasing to 20-30 mph and gusts to around 35 mph across northern Sierra Thursday afternoon

SoCal: High temperatures in the 60s and 70s, with 80s in desert areas. Light rain showers spread down Central Coast Thu. Night and into the SoCal mountain locations by early Fri. Winds generally 10 to 20 mph with gusts to 30 mph for mountain and desert locations.

OUTLOOK (Friday, November 3rd - Tuesday, November 7th)

NorCal: Storm system will bring periods of increased winds, widespread low elevation rain and mountain snow. Highs in the 50s-60s through the weekend, with 30s and 40s in the mountains.

SoCal: A storm system could bring some light precipitation and increasing winds to southern California Saturday evening through Monday. Temperatures in the 60s-70s, with 80s in desert areas.
